RE COMMENTS; Technical Memorandum No. 1 (TM-1) to the FINAL, Phase I, RFI/RI  
WORKPLAN, ROCKY FLATS PLANT, Walnut Creek Priority Drainage, Operable Unit  
No 6, September 1992

Dear Mr Hestmark

The Colorado Department of Health, Hazardous Materials and Waste Management  
Division (the Division) has reviewed the subject document submitted by DOE and  
prime contractor, EG&G

The Division recommends that EPA withhold approval of this document. While some  
changes are appropriate, others are unacceptable DOE should carefully consider  
the attached comments (including the those from Jeb Love to Harlen Ainscough  
specific to the sampling and analysis of water), discuss them with EPA and the  
Division, then revise the document.

The Division specifically believes that curtailment of the Site Wide Surface  
Water Sampling Program has undermined the strategy of the OU-6 Field Sampling  
Plan; however, this presents an opportunity for all parties to establish sampling  
stations in a manner consistent with those recently adopted for the Woman Creek  
Operable Unit (OU-5) To that end, it is the Division's intent that existing  
sites be used to the fullest extent possible in formulating a revised sampling  
plan

If you have any questions concerning the comments, please call Harlen Ainscough  
of my staff at 692-3337.

Sincerely,

*Gary W. Baughman*

Gary W Baughman, Chief  
Facilities Section  
Hazardous Waste Control Program
